

Table of contents (poster session)

Special session: Fuel cycle strategies and transition scenarios

B. Carlier

COSAC: A computational code for investigations on nuclear fuel cycles

T. Fukasawa, J. Yamashita, K. Hoshino, A. Sasahira, T. Inoue, K. Minato, S. Sato

Flexible transition system from LWR cycle to FBR cycle

Session I: Impact of P&T on waste management and geological disposal

F. Álvarez-Velarde, F. Martín-Fuertes, E.M. González-Romero

Analysis of European fuel cycle transition and equilibrium scenarios with LWR and ADS

B. Merk

On the consequences of a lifetime extension on the accumulated plutonium mass in Germany

T. Iwasaki, Y. Ogata, K. Mizutani

Study on partitioning of high-level waste related to geologic disposal area

Session II: Progress in transmutation fuels and targets

K. Nakajima, T. Iwai, Y. Arai, M. Kurata, K. Nakamura, Y. Arita

Preparation of TRU alloys by electrochemical or lithium reduction method

T. Nishi, M. Takano, A. Itoh, M. Akabori, Y. Arai, K. Minato

Thermal conductivities of neptunium and americium mononitrides

M. Osaka, K. Tanaka, S. Miwa, K. Kurosaki, M. Uno, S. Yamanaka, S. Takano, Y. Yamane

Molybdenum-CERMET fuel concept for rapid incineration of minor actinides in fast reactors*

O. Runevall, N. Sandberg, J. Wallenius

Helium transport in a CERMET fuel matrix

Y. Tachi, T. Donomae

Characteristics of iodides for target fabrication

M. Takano, M. Akabori, Y. Arai, K. Minato

Thermal expansion of TRU nitrides as the fuel materials for transmutation of minor actinides

K. Maeda, S. Sasaki, F. Kono, M. Kato, Y. Kihara

Americium redistribution in irradiated (Am,Np,Pu,U)O_{2-x} fuels for fast reactors

Session III: Progress in partitioning, waste forms and management

J-Ph. Dancausse, S. Grandjean, N. Herlet, C. Viallesoubranne, C. Léorier, B. Arab Chapelet, O. Conocar
Results on U(IV)/MA(III) co-precipitation studies for MA-bearing oxide solid solution synthesis

* The full paper being unavailable at the time of preparation of this CD-ROM, only the abstract is included.

- G.D. DelCul, B.B. Spencer, R.T. Jubin, E.D. Collins
Development and testing of an advanced head-end*
- K. Gompfer, A. Geist, M.A. Denecke, P. Panak, H. Geckeis
R&D on partitioning at the German research centre Karlsruhe (FZK)
- W-M. Choung, I-J. Cho, E-P. Lee, K-C. Kwon, D-H. Hong, K-S. You, H-D. Kim
Design features of a mock-up facility for the demonstration of a pyroprocessing system
- A.G. Espartero, P. Prados, M.T. Murillo, J. Sánchez-Quesada, J.C. Iglesias-Sánchez, A. Núñez, J. de Mendoza
Stability against hydrolysis and radiolysis of bis-DGA UAM-069 and UAM-081 for the co-extraction of actinides(III) and lanthanides(III) from high-level wastes issued from the PUREX process
- H. Hayashi, M. Akabori, Y. Arai, K. Minato
Study on pyrochemical process for the treatment of spent nitride fuel containing americium
- X. Hérès, C. Sorel, C. Hill, P. Baron
A new concept for An(III)/Ln(III) separation using TODGA extractant
- S-H. Kim, D-S. Yoon, Y-J. You, S. Paek, J-B. Shim, S-W. Kwon, K-R. Kim, H-S. Chung, D-H. Ahn, H-S. Lee
Development of liquid cathode stirrers in zinc-gallium system and its application to uranium-cadmium system
- K. Kinoshita, T. Tsukada
Counter-current extraction test in LiCl-KCl and liquid Cd system for pyropartitioning and pyroprocessing
- S. Koyama, M. Ozawa, K. Okada, Y. Sato, K. Kurosawa, K. Tatenuma, T. Suzuki, Y. Fujii
Safety research for multi-functional reprocessing process based on ion-exchange method*
- S-W. Kwon, Y-J. You, S-W. Paek, K-R. Kim, S-H. Kim, J-B. Shim, H. Chung, D-H. Ahn, H-S. Lee, E-H. Kim
Recovery of actinides from a liquid cathode by a cadmium distillation
- M. Ozawa, T. Suzuki, S. Koyama, I. Yamagishi, R. Fujita, H. Mimura, Y. Fujii
Multi-functional reprocessing system toward future nuclear fuel cycle*
- B-H. Park, I-W. Lee, J-M. Hur, H. Lee
Electrochemical reduction of U_3O_8 powder in a molten LiCl-Li₂O salt
- E. Aneheim, C. Ekberg, A. Fermvik, M. St.J. Foreman, J-O. Liljenzin, T. Retegan, G. Skarnemark
Partitioning and transmutation in Scandinavia – Chalmers Group
- Y. Sasaki, T. Asakura, Y. Kitatsuji, Y. Morita, T. Kimura
Counter-current extraction and separation of Nd from Sr, Zr and Pd by TDdDGA, N,N,N',N'-tetradodecyl-diglycolamide
- T. Satoh, T. Iwai, Y. Arai
Electrolyses of burn-up simulated uranium nitride fuels and actinide nitrides containing inert matrix materials in a molten LiCl-KCl eutectic
- E. Aneheim, C. Ekberg, A. Fermvik, M. St.J. Foreman, T. Retegan, G. Skarnemark
Development of equipment for pilot scale tests of processes for partitioning and transmutation
- V. Smolenski, A. Novoselova, A. Bovet, A. Osipenko, M. Kormilitsyn
Electrochemical behaviour of ytterbium trichloride in fused equimolar NaCl-KCl
- Y. Sugo, M. Taguchi, Y. Sasaki, T. Kimura
 α -radiolysis of amidic extractants by helium ion beam*
- Y. Takahashi, H. Hotokezaka, K. Noda, M. Nogami, Y. Ikeda
Extraction of uranyl(VI) using pyrrolidone derivatives as extractants and extraction behaviour in microchemical chip
- T. Suzuki, M. Tanaka, S. Koyama
Recovery of minor actinides from spent molten salt waste and decontamination of molten salt waste

* The full paper being unavailable at the time of preparation of this CD-ROM, only the abstract is included.

K. Chuchvalcová Bímová, M. Straka, R. Tuláčková

Electroreparation studies of the actinides and lanthanides in molten fluoride media

M. Watanabe, M. Arisaka, T. Kimura

Separation of trivalent actinides from lanthanides by impregnated resin with new *N,N'*-dialkyl-*N,N'*-diphenylpyridine-2,6-dicarboxyamides

K.R. Kim, B.G. Park, D.H. Ahn, S. Paek, S.W. Kwon, J.B. Shim, S.H. Kim, J.G. Kim,

H.S. Lee, E.H. Kim, K.W. Yi, I.S. Hwang

Electro-fluid analysis of a molten salt electrolysis for a nuclear waste treatment

J.H. Lee, K.H. Oh, Y.H. Kang, S.C. Hwang, H.S. Lee, J.B. Shim, E.H. Kim

Electrorefining characteristics of a high throughput electrorefiner for a spent metallic nuclear fuel

Y. Endo, T. Tachibana, W. Yan, L. Chuanpin, H. Mimura,

Y. Niibori, I. Yamagishi, S. Koyama, M. Ozawa, M. Kamiya

Selective separation of nuclides by hybrid microcapsules (1). Separation of heat-generating nuclides (Cs, Sr)

W. Yan, K. Ikeda, L. Chuanpin, H. Mimura, Y. Niibori, M. Osaka, S. Koyama, Y. Wakui

Selective separation of nuclides by hybrid microcapsules (2). Separation of rare metals (Re, Mo)

H. Niki

Laser isotope separation of zirconium-93

S-B. Park, D-W. Cho, G-H. Oh, J-H. Lee, S-C. Hwang, Y-H. Kang, H-S. Lee, E-H. Kim, S-W. Park

Behaviours of a salt evaporation of the uranium deposits from an electrorefiner

K. Takeshita, T. Ogata, K. Tsuda

Extraction of perrhenate ion with podand-type nitrogen-donor ligand*

P. Deepika, K.N. Sabharwal, T.G. Srinivasan, P.R. Vasudeva Rao

Studies on lanthanide-actinide extraction using anchored malonamide resin

Y-Z. Wei, T. Arai, H. Yamazaki, K. Ishii

Separation behaviour of some fission products (Ru, Tc, etc.) with electrochemical/anion exchange method

S. Suzuki, T. Yaita, Y. Sugo, T. Kimura

Development of *N,N*-di-alkylamides for U(VI) selective separation

T. Matsumura, K. Takeshita, Y. Inaba, A. Mori

Am(III)/Eu(III) separation with hydrophobic alkylated TPEN

A. Paulenova, B. Drtinova, J.L. Lapka, M.Yu. Alyapyshev, V.A. Babain, R.S. Herbst, J.D. Law

The effects of hydrolysis and radiolysis on the extraction of lanthanides and actinides with diamides of dipicolinic acid

Session IV: Progress in materials, including spallation targets and coolants

Y. Kurata, S. Saito

Results of corrosion tests in liquid Pb-Bi at JAEA – temperature and oxygen concentration dependence, and corrosion properties of Si-enriched steels

H. Obayashi

Flow measurement of high temperature liquid metal using ultrasonic Doppler profiling

Session V: Progress in transmutation physics experiments and nuclear data

A. Lafuente, A. Abanades, F. Sordo, J.M. Martinez-Val, M. Piera, P. Teles, P. Vaz, P. Baeten, B. Arien

Reactivity accidents in the GUINEVERE experiment

* The full paper being unavailable at the time of preparation of this CD-ROM, only the abstract is included.

B. Merk

An analytical solution for a simple time dependent neutron transport problem: Shutdown of the external source

C-H. Pyeon, T. Misawa, H. Unesaki, K. Nakajima, S. Shiroya

Future experiments on minor actinide characteristics using accelerator-driven system in Kyoto University Critical Assembly

C. Sage, A. Borella, S. Kopecky, A. Plompen, P. Rullhusen, P. Schillebeeckx, V. Semkova, P. Siegler
Determination of ²⁴¹Am cross-sections

T. Sasa, T. Sugawara, T. Fukahori, K. Kosako

Continuous-energy cross-section library based on JENDL High Energy File 2007

T. Sugawara, T. Sasa, H. Oigawa

Importance of reactor physics experiment using MA-bearing fuel

Session VI: Transmutation systems: Design, performance and safety

A. Batta, A. Class, K. Litfin, M. Dierckx, H. Jeanmart, F. Roelofs, P. Schuurmans, K. Van Tichelen
Numerical study of the water experiment for XT-ADS windowless spallation target

X-N. Chen, W. Maschek, P. Liu, A. Rineiski, S. Wang, C. Matzerath Boccaccini, V. Sobolev, Y. Zhang
Parametric studies of an EFIT core with CERMET fuel

I-S. Hwang, M-H. Kim, H-G. Joo, B. Yoo, M-H. Kim, S-R. Oh, K-W. Yi, J-Y. Lim, D-Y. Han,
J. Lim, H-O. Nam, J-H. Cho, K-Y. Lee, M-H. Bae, S-Y. Choi, C-H. Kim, S-H. Kim

Development of PASCAR (proliferation-resistant, accident-tolerant, self-sustainable, capsular, assured reactor) design and safety analysis*

V. Ignatiev, D. Da Cruz, S. Dulla, O. Feynberg, M. Kormilitsin, E. Malambu, W. Maschek,
P. Ravetto, A. Rineiski, M. Schikorr, A. Stanculescu, V. Subbotin, M. Szieberth, J. Uhlir, R. Zakirov

Main results of IAEA CRP "Studies of Advanced Options for Effective Incineration of Radioactive Waste":
Case for molten salt transmuter

G.L. Khorasanov, V.V. Korobeynikov, A.P. Ivanov, A.I. Blokhin

Accelerator-driven systems and fast reactors cooled by lead-208: A possibility for reducing initial fuel load and increasing the transmutation rate

K. Litfin, A.G. Class, M. Daubner, S. Gnieser, R. Stieglitz

Experimental investigation of subchannel flow distribution in a hexagonal rod bundle experiment

S. Maruyama

Feasibility of FBR core concept with two different TRU composition regions

P. Meloni, P. Agostini, M. Giardina, M. Casamirra, F. Castiglia, C. Lombardo

Verification of the RELAP5 code against the MEGAPIE irradiation experiment

M. Naganuma, F. Kono, T. Mizuno, S. Kubo

Evaluation of JSFR oxide fuel core TRU burning capability

T. Sasa, K. Nishihara, T. Sugawara, H. Oigawa

Liquid-fuelled accelerator-driven transmutation system

T. Sugawara, K. Suzuki, K. Nishihara, T. Sasa, Y. Kurata, K. Kikuchi, H. Oigawa

Investigation of beam window structure for accelerator-driven system

N. Takaki, S. Permana, H. Sekimoto

Actinide burning performance of water-cooled thorium breeder

H. Takei, K. Nishihara, K. Tsujimoto, H. Oigawa

Evaluation of the acceptable frequency of beam trips based on thermal responses of the ADS reactor system

* The full paper being unavailable at the time of preparation of this CD-ROM, only the abstract is included.

-
- P. Teles, A. Lafuente, B. Arien, P. Baeten, J-M. Martinez-Val, Y. Romanets, P. Vaz*
Monte Carlo simulation of thermally-induced reactivity variations in the GUINEVERE facility
- M. Tesinsky, C. Berglöf, A. Fokau, B. Martsynkevich, I. Serafimovich, V. Bournos, A. Khilmanovich, Y. Fokov, S. Korneev, C. Routkovskaia, H. Kiyavitskaya, W. Gudowski*
Neutron flux characteristics of the YALINA-Booster core based on experiments in comparison with MCNP calculations
- S. Ishida, A. Fokau, Y. Zhang, J. Wallenius*
A source efficient ADS for minor actinide burning*
- A. Gulevich, A. Degtyarev, A. Kalugin, O. Kolyaskin, V. Konev, L. Ponomarev, V. Seliverstov, E. Zemskov*
Efficiency estimation criteria of the different ADS burners
- L. Popa-Simil*
Micro-hetero nuclear fuel related developments for near-perfect burning*
- L. Popa-Simil*
Nanograin-based fuel for ^{232}Th , and DU transmutation*
- E. Bomboni, N. Cerullo, G. Lomonaco*
New developments in actinide burning with symbiotic LWR-HTR-GCFR fuel cycles: Perspectives and challenges

* The full paper being unavailable at the time of preparation of this CD-ROM, only the abstract is included.
